POWERED by
HONDA™

The 3" and 4" Trash Pumps powered by a Honda GX240 and GX270 petrol engines. These pumps are designed to safely move contaminated water without being damaged. It is ideal for a range of tasks such as moving water containing solids (e.g. flood water), effluent pumping, slurry pumping and water transfer.

The pumps are made from heavy duty cast iron and features a big, closed impeller that is resistant to wear. The quick release system allows rapid access to the impeller for removing debris. The MH30T is capable of safely moving solids up to 25mm in diameter and 28mm for the MH40T-2 and MH40TE-2. A sturdy rollover frame makes for easy portability and protection of this hardworking pump. The hard wearing reliability, impressive performance and portability make this pump a popular choice for industrial and agricultural applications. SES brigades rely on this model for those reasons.
