4" WATER TRANSFER PUMP with E-START

MH40E-2

The MH40E-2 is a 4" Water Transfer Pump with a high flow rate up to 1,420 L/min, and large, robust single impeller. This pump is lighter than many competitors, and with a sturdy roll frame it is a portable solution for moving a lot of water. It is powered with the legendary reliability of a Honda GX petrol engine and features an electric start system. Manufactured in Australia, it is made with high quality parts and the pump components are all made from cast aluminium.

Perfect for water transfer between dams or tanks, flood irrigation, site dewatering and stock watering.

* Specifications are subject to change without notice. Images are for display purposes only. Product may differ from images displayed. Performance data has been measured at the pump. The performance of our Pumps as noted above can be affected by the installation and configuration of the pipe work and distances involved. Example – suction head, static head, friction head. Which all need to be considered when determining the appropriate pump size.
